

## **Grammata on the Evil of Hearsay**

**Certain rumors or whatever it may be that may be held against church leaders without evidence have never been found worthy of a response due to their frivolous nature. They would be a rather amusing observation were their perpetrators not revealing themselves in their own psychotic state.**

**If someone would like to receive references about a person, it is advised to obtain it from reputable sources, such as a local clergy association or council, Police and Fire Departments, present and former employers, etc. – It is hence a scam to elicit information about an individual, a church or a faith group through questionable sources and hate groups due to the their unstable condition and antichristian agenda.**

**It is needless to say that everything being said or claimed requires substance, verification and objectivity. Once a person makes a claim or a statement about another individual or organization but would or could not produce documentary evidence, even a gullible audience will soon find itself fooled and ridiculed.**

**Let us remember that the devil is trying to destroy the church also from within, by people who often use hidden agendas and clever disguise. We must realize that there are and always will be mentally unstable and psychologically unbalanced individuals in every part of society. It is more Christ-like to categorize them on the human level rather than trying to argue over their deception.**

**The more one is envied and attacked by such people, the more it confirms that one is on the right path, because evil has always tried to destroy the good.**
